

CORONAVIRUS

AS the fear of the Coronavirus sweeps across the country, we thought it would be helpful to post a few tips for you.

IT IS BELIEVED TO BE TRANSMITTED BY:

1. Through the air by coughing and sneezing.
2. Close personal contact such as touch or shaking hands.
3. Touching contaminated surfaces, then touching the mouth, nose or eyes.

The virus can be easily killed with many disinfectants so you should clean and disinfect properly with a disinfectant that has a kill claim for Human Coronavirus.

- Disinfect high touch areas frequently: toilet flushers, door handles, faucets, light switches, etc.
- Use proper handwashing techniques and wash hands often.
- Think about the fact that every time you touch a high-touch object such as a door handle or even the faucet handles, there is a good chance you now have some sort of germ on your hands. Avoid touching your eyes, nose, mouth or eating foods after touching these high touch objects until you have had time to properly wash your hands.
- Stay away from sick people.

PRODUCTS THAT KILL CORONAVIRUS

Product Name	Martin Bros. Item #	Dilution Rate	Contact Time	Pack/Size
TMA Conc. Neutral Lemon Disinfectant	190328	2 oz/gal	10 min	4/1 gal
